### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Lent on 09/16/05.

The application has been amended as follows:

- Cancelled claims 1-9

The following is an examiner's statement of reasons for allowance:

- Non-elected claims 1-9 are cancelled to put application in condition for allowance
- The primary reasons for allowance for claims 10-18 are the inclusion of an inkjet printer comprising a plurality of head groups, each group comprises a plurality of line heads ejecting different color inks, each of the line heads comprises a plurality of nozzles that are arrayed at intervals of predetermined number of pixels along a direction perpendicular to the conveyance direction, and the plurality of line heads in one head group are arranged according to the plurality of line heads in the other head group so as to dispose the plurality of nozzles in the line heads in one head group and the plurality of

nozzles in the line heads in the other head group on the same column along the conveyance direction, and the line heads having nozzles disposed on one same column jet the ink having different colors from each other. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Suzuki et al. (6,254,218) teach a plurality of line heads whose nozzles are shifted from each other
- Torgerson et al. (6,315,389) teach a printhead having arrays of nozzles that are shifted from each other
- Narushima (6,003,972) teaches a plurality of nozzle arrays whose nozzles are arranged along the direction of conveyance moving direction
- Silverbrook et al. (6,398,332) teaches a printhead having a plurality of head segments, each segment comprising different colored inks
